SUMMARY

Cybersecurity-focused engineering student with hands-on experience in penetration testing labs, SIEM-based analysis, and AI-driven systems. Ranked in the top 1% on TryHackMe with 200+ labs and a 160+ day learning streak. Built real-world systems including an edge-AI robotic platform and a full-stack Django application. Skilled in Python, Linux, and network security, with strong interest in threat detection and incident response.

KEY ACHIEVEMENTS

- Ranked in Top 1% on TryHackMe with 200+ completed cybersecurity labs
- Maintained 161-day continuous learning streak in cybersecurity (demonstrates discipline and consistency)
- Completed Jr Penetration Tester and SOC Level 1 learning paths
- Developed real-time AI-based object detection system using MobileNet SSD
- Built full-stack web platform with Django backend and user management system

TECHNICAL SKILLS

Cybersecurity & Networking:

- Penetration Testing (TryHackMe Labs), Reconnaissance & Enumeration
- Network Analysis using Wireshark, Nmap
- Web Application Testing using Burp Suite
- SIEM & Monitoring: Elastic Stack, Basic SIEM Operations
- Intrusion Detection Systems (Snort)
- Log Analysis, Threat Detection, Vulnerability Assessment

Web Development:

- HTML, CSS, JavaScript
- Backend Development with Django

Productivity & Documentation:

- LaTeX (technical documentation)
- Microsoft Office (Word, PowerPoint, Excel)

HANDS-ON EXPERIENCE

Cybersecurity Practice (TryHackMe)

- Performed penetration testing labs including reconnaissance, enumeration, and exploitation in controlled environments
- Analyzed logs and detected anomalies using SIEM tools (Elastic Stack)
- Investigated simulated attack scenarios and documented incident response reports
- Applied Linux and SQL for log parsing, threat detection, and basic forensic analysis

Technical Projects & Automation

- Developed Python scripts for log parsing and anomaly detection to improve analysis efficiency
- Built real-time object detection system using MobileNet SSD and OpenCV on edge device
- Implemented backend logic and user authentication systems in full-stack Django applications

PROJECTS

Autonomous Robot Car with Edge AI Vision

- Built Raspberry Pi-based system using MobileNet SSD for real-time object detection
- Integrated Bluetooth control and Flask server for live detection streaming

ProgressNest – Full-Stack Learning Platform

- Developed Django-based platform with authentication, dashboards, and community features
- Designed backend for user progress tracking and data management

TripEase – Weather & Data Analytics Platform

- Integrated NASA and weather APIs for real-time and predictive insights
- Built comparison system for 64 districts with dynamic data visualization

EDUCATION

Chittagong University of Engineering and Technology (CUET)

B.Sc. in Electronics and Telecommunication Engineering (ETE)
2022 – Present

ADDITIONAL INFORMATION

Languages: English, Bangla.

Certifications: Google Cybersecurity Professional (Coursera) | Jr. Penetration Tester | SOC Level 1 (TryHackMe)
